Vermont Health Connect makes it easier for small businesses to access the same quality coverage as large businesses. Small businesses are no longer forced into a one size fits all solution. Moving forward, your employees can use your contribution and select a plan that fits their unique medical needs and budgets.

HOW DOES IT WORK?

It's simple: you pick the plans that will be available to your employees and the amount your business will contribute. Then, your employees can go to **Vermont Health Connect** and sign up for the plan that best suits them. You don't have to guess what works best for everyone. The choice is now in the hands of each employee.

DOES MY BUSINESS QUALIFY?

In 2014, **Vermont Health Connect** will be the only health insurance marketplace for small businesses with 50 full-time employees or fewer. In 2016, businesses with 100 employees or fewer will use **Vermont Health Connect**.

DO I HAVE TO OFFER HEALTH INSURANCE TO MY EMPLOYEES?

No, it's up to you to decide. For help weighing your options and financial considerations visit VermontHealthConnect.gov and click on the Small Employer Estimator.

WHERE CAN I GET HELP?

Help is available through a Vermont-based call center, Navigators who can meet with you in your community, and licensed, registered brokers. Find contact information on the reverse side of this card.
